

Public Private Partnership

Amitha Prasad, IAS.,
Director General
ATI Mysore

Need for PPP

- **Huge investment requirement in infrastructure projects**

PPP Project Process Management

- **Project Identification.**
- **Preparation of Initial Screening Report (ISR).**
- **Project Development Studies (Demand Assessment, Estimates, Risk Management, Financial Structuring)**
Developing of Contractual Structure.

- **Preparation of Bid documents.**
- **Bidding Process**
- **Selection of Private Sector**
- **Signing of Concession/ Contract.**
- **Monitoring performance and cost.**
- **Support for making project viable.**

• **Project
preparation**

Procurement

Development

Operation

Learning from experience

Timarpur Solid Waste Management Project
Detailed study done and approval taken at project preparation itself SPV incorporated before launch of project.

Procurement

Dealing with speculative bid
should be avoided.

PPP : Attributes

Attribute	Public	PPP
Responsibility	Government	Government
Ownership	Government	Government
Nature of Services	Government	Mutual agreement
Risk and Reward	Government	Shared between Government and Private Party.

Challenges

- **Budgets are decided externally
no direct control on resources.**
- **Poor collaboration among
departments .**
- **Difficult internal operations.**
- **New focus on Citizen.**

Strategy

- Focus on building employee skill, and technology infrastructure.
- Adopt – Donot Adopt.
- Establish accountability at all levels.
- Create Good image of Government.
- Good availability.
- Continuous improvement.
